

BACK TO NATURE

100% NATURAL KRATOM ALKALOID TABLETS

Product Information Guide

REVOLUTIONARY SECONDARY ALKALOID CONTENT - PRE-MEASURED AND PRECISE

We are proud to bring you the most comprehensive kratom extract tablet on the market, highlighting the spectrum of valuable alkaloids this incredible plant holds *naturally*. Our patented, all green extraction method has been perfected to such a degree that the secondary alkaloid content we have been able to yield is, to date, unprecedented in the industry. While our Full Spectrum Kratom Alkaloid Tablets contain an impressive 33% secondary alkaloid content, the Back to Nature 100% Natural Kratom Alkaloid Tablets boast an even greater, 50% secondary alkaloid content. Speciociliatine, Paynanthenine, and Speciogynine come to play in never before seen amounts, bringing you a truly cutting edge experience - *naturally*.

Each Back to Nature tablet contains 100 mg of Mitragynine and 100 mg of secondary alkaloids, boasting a 50% secondary alkaloid content and multiple servings per tablet.

ONLY NATURALLY PRODUCED SECONDARY ALKALOIDS

The landscape of the kratom industry has changed drastically in the last few years, with technology advancing the way we consume and utilize this plant in ways many never thought possible. Herba Re-Leaf spares no expense to stay at the pinnacle of that technological landscape when it comes to our extracts, but as with any advancement there have been some inadvertent side effects as well. The surge in synthetic and semi-synthetic alkaloids has led to unintended negative side effects for consumers and the community.

Herba Re-Leaf has first handedly seen the impact that these semi-synthetic alkaloid products bring to the community, and has felt compelled to utilize our all-green extraction process and the substantial *natural* amounts of Speciociliatine, Paynanthenine, and Speciogynine we have been able to pull from plain leaf kratom powder to offer a natural alternative. We are pleased with the results and are incredibly excited to offer them to our valued Herba family - as well as those who haven't found us yet and may be working to quit consuming semi-synthetic alkaloid products.

100% NATURAL INGREDIENTS

Everything about the Back to Nature tablets is natural, from the extraction process used to make the kratom extract itself, to the binders used to make the tablets.

Herba Re-Leaf uses a Patented, all-green extraction process with only food-safe ingredients—no harmful solvents, research chemicals, alcohol, or synthetic alkaloids. This method extracts a higher concentration of secondary alkaloids, making Back to Nature the most complete extract tablet on the market, entirely free of synthetic or semi-synthetic alkaloids and harmful chemicals.

While other tablet lines use synthetic cellulose derivatives, sugar alcohols or other minerals to bind their tablets, Herba Re-Leaf uses plant based, natural binders. Aside from the kratom extract and raw, plain leaf kratom powder, you will only find organic guar gum, organic arabic gum, organic agave and rice fiber, and organic agave syrup in our Back to Nature 100% Natural Kratom Alkaloid Tablets.
